audiovisual presentation wherein the user image is associated with and integrated into the selected portion of the predefined audiovisual presentation.--

--57. A system for providing a display presentation, the system comprising:
a storage device containing a stored audiovisual presentation produced by the
process of:

providing a predefined audiovisual presentation;

providing at least one user image;

selecting an image portion of the predefined audiovisual presentation as a
selected portion for user image associative integration;

analyzing the selected portion of the predefined audiovisual presentation;

integrating the user image with the selected portion of the predefined
audiovisual presentation, responsive to the analyzing, thereby producing the output
audiovisual presentation wherein the user image is associated with and integrated into the
selected portion of the predefined audiovisual presentation;

storing the output audiovisual presentation in a non-volatile form; and

a display apparatus for providing a display presentation responsive to the
storage device.--

--58. The system as in claim 57, wherein the display presentation is comprised of at least one of visual, audio, and audiovisual.--

--59. The system as in claim 57, wherein the display apparatus is at least one of a video display, an audiovisual display, a film-based movie projector, a digital input-based movie projector, a television, a computer display, and a video game display.--
